

LED Name Badge

Scrolling LED Display

Model "B"

LED Name Badge – Scrolling LED Display – Red Display

Overview:

The LED Name Badge has a total of 6 separate message memories, with the first memory storing up to 512 characters, while the remaining five can store up to 256 characters each.

Power to the unit is provided by a single, commonly available, CR2032 button cell lithium battery, with can run the display for many hours depending on how bright the display is set to.

Operation:

To turn the unit on or off, simple press the "Enter On/Off" button.

The unit offers a number of programming modes. The modes are accessed by pressing the "Page Up" button. Each press of the button will advance the display through the menu options of "Switch", "Input", "Speed" and "Lum". When you have selected the operation mode, press the "Enter On/Off" button to select that feature.

Switch: Allows for the selection of which memory will be displayed. Cycle through the memories using the "Page Up" and "Page Down" buttons, the memory number will be displayed. When you have found the option required, press the "Enter On/Off" button select that item as active.

Input: Allows for you to enter your message into the current memory bank (as selected by the Switch option). Use the "Page Up" and "Page Down" buttons to cycle through the available letters and special characters. Once a character has been identified to include, press the "Enter On/Off" button to confirm and move to the next letter. A space can be entered by not advancing the "Page Up" or "Page Down" and pressing enter a second time. You can delete a character by pressing the "Enter On/Off" for 3 seconds. Once you have finished entering your message, press "Page Down" for three seconds or simply waiting 10 seconds without pressing any buttons.

Lum: Adjusts the luminance (intensity) of the display. With a range from a low of 1 to a high brightness of 9. Pressing the "Page Up" and "Page Down" to select the desired intensity and press the "Enter On/Off" to select your option.

Speed: Adjusts the speed at which the display scrolls. With a range from a slow speed of 1 to a high speed of 9. Pressing the "Page Up" and "Page Down" to adjust the desired speed level and press the "Enter On/Off" to select your option.
